We miss you every day

Compassion towards living beings is the true religion. The sheer good fortune of having a human life to spend many years in this beautiful world of ours requires us to pay some rent in lieu. Doing something nice or useful for the needy is the rent that we pay.

Our Founder

Late Mr. S. K. Shahi was a rare blend of intellect, integrity, and purpose. A distinguished management consultant and thought leader with over three decades of experience, he advised some of India's leading public sector institutions, including ONGC, Indian Oil, and GAIL, shaping leadership practices and organizational thinking across the country. A prolific author and lifelong learner, his seminal book Mission Leadership, inaugurated by former Prime Minister Dr. Manmohan Singh, reflected his deep belief in values-driven leadership. Honoured with the Mahatma Samman Puraskar at the House of Commons, London, He was admired not only for his professional brilliance but also for his empathy, humility, and unwavering faith in human potential.In 2008, this belief found its most enduring expression in the founding of the Centre for Social Responsibility & Leadership (CSRL). What began as a vision to bridge socio-economic divides through education soon became a movement. Through the flagship Super 30 programme, Mr. Shahi created pathways for meritorious students from underserved backgrounds to access premier institutions, regardless of financial constraints. From a single centre to a national presence across 25+ cities, CSRL has transformed over 8,000 lives, earning global recognition, including a Harvard Business School case study. Though Mr. Shahi is no longer with us, his legacy continues—quietly, powerfully—each time a young mind finds opportunity, dignity, and the confidence to dream beyond circumstance.

Message from Chairman

Dear Valued Stakeholders,

At CSRL, we believe the truest measure of social justice is giving everyone a fair shot at opportunity. As we step into another year of change, that mission has never felt more urgent. CSRL was built not for moments, but for the enduring need to bridge the gap between talent and opportunity.

Our conviction is simple: talent is everywhere, opportunity is not. That's where we step in. We don't work through charity, we commit for the long haul. By building skills, nurturing confidence, and opening doors, we help young minds shape their own futures. Education, combined with mentorship and belief, has the power to transform lives. And when those lives flourish, they ripple back into the communities that raised them, creating cycles of growth that drive real change.

Our vision goes beyond classrooms. We aim to nurture "Responsible Leaders", not just world-class engineers, but citizens with empathy, pride, and a sense of purpose. CSRL's journey continues with humility, purpose, and unwavering faith in human potential. The impact of our work may not always be visible immediately, but it endures—in the choices made, the paths taken, and the lives quietly, yet powerfully, transformed. And this transformation further acts as a catalyst, initiating a sustained chain of positive impact. It is this enduring impact that the Transformational Index seeks to reflect and acknowledge.

Through the Transformational Index, I respectfully convey my gratitude to the friends, partners, and well-wishers of CSRL, whose continued support strengthens this shared journey, and extends my warmest wishes to all for a happy, peaceful, and prosperous New Year.

Santosh Kumar Vajpayee
Chairman

From Director General's Desk

Dear Readers,

Transformation does not happen by chance, it happens when belief is followed by action, and vision is sustained by collective effort. At CSRL, our journey has always been about more than growth in numbers; it has been about expanding hope, widening access, and standing firm in the belief that talent deserves opportunity, regardless of geography or circumstance.

Edward Everett Hale's words, "Coming together is a beginning; keeping together is progress; working together is success," resonate deeply with me because they reflect how CSRL has evolved—step by step, through trust, collaboration, and shared purpose.

CSRL was founded on the vision of the Late Shri S. K. Shahi, a vision rooted in equity and possibility. From the very beginning, this vision was never meant to stand alone. It has been strengthened by the faith of our supporters, the commitment of our partners, and the generosity of our sponsors, who continue to believe in the power of education as a force for transformation.

Over the years, together, we have extended CSRL's presence across the country—reaching regions where aspirations for institutions like IITs and AIIMS were once distant dreams. Each centre established, each student mentored, and each life impacted represents meaningful progress achieved through collective resolve.

Yet, I firmly believe that true success still lies ahead. Social transformation is not a milestone we arrive at; it is a responsibility we carry forward—one that demands continuous learning, reflection, and renewed commitment.

This Transformational Index offers a glimpse into this ongoing journey. It reflects the change we have been able to create in the lives of our students and stands as a sincere expression of gratitude to all those whose support has been the cornerstone of this work.

As we move forward, I remain grateful for the trust placed in CSRL. Together, we will continue to push boundaries, deepen impact, and ensure that opportunity reaches every deserving mind.
With resolve and gratitude,

Nripen Bharali

I always dreamed of becoming an engineer, but the path to IIT felt far beyond my reach due to the high cost of coaching and limited access to quality resources. The academic year 2024–25 became a turning point in my life when I was selected for the **Petronet Kashmir Super 50, Srinagar** programme. The dedicated management and passionate faculty provided the guidance, discipline, and motivation I needed to move forward with confidence.

From the very first day, I committed myself to a rigorous routine of early mornings, late-night revisions, and relentless practice. I faced challenges across Physics, Chemistry, and Mathematics, along with moments of self-doubt, but I remained determined and never gave up.

The faculty played a pivotal role in my journey. They patiently explained concepts, cleared every doubt, and constantly encouraged me to aim higher. Their belief in my potential inspired me to push my limits. The programme also ensured a peaceful learning environment, structured schedules, nutritious meals, and essential study materials, all provided free of cost, allowing me to focus entirely on my preparation.

Today, I am proud to have cleared the **IIT JEE** and secured admission to **IIT Kharagpur,** one of India's most prestigious institutions. My journey stands as a reminder that financial hardship cannot stop determination when hard work is supported by the right guidance.

I come from a small village called Chanunta in Udhampur district, Jammu & Kashmir. I completed my schooling at the government school in my village, where most students were unaware of what the IIT-JEE examination even was. And even if someone had heard of it, preparing for such an exam felt far beyond imagination.

I myself first learned about JEE only after entering Class 11. However, with no mentorship, guidance, or exposure, I never dared to begin preparation. In Class 12, our school informed us about an entrance test being conducted at another school. I appeared for the test, went through an interview, and was fortunate enough to clear both.

That moment marked the beginning of my transformation—when CSRL entered my life. Over the next 11 months, with constant guidance from dedicated teachers and supportive mentors, I evolved from having almost no confidence to believing in my own potential. Structured self-study, regular doubt-solving sessions, and collaborative group discussions became the pillars of my growth.

Today, I can say with complete conviction that CSRL is not just a coaching centre. It is a family—one where everyone supports, challenges, and pushes each other to learn, grow, and dream bigger.

I belong to Bihar, and today, I have the privilege of studying at **IIT (BHU), Varanasi.** My journey to this milestone began under the **ONGC Super 30 program in Himachal Pradesh,** where I had the guidance and mentorship of dedicated faculty members who, along with the entire management team, provided unwavering support, motivation, and encouragement.

Coming from a middle-class family, with my father working as a factory worker in Himachal Pradesh, I have faced financial challenges from an early age. Being the eldest in my family, the responsibility was significant, and opportunities were limited. Yet, the dream I once nurtured has become a reality today, thanks to the strong foundation and guidance offered by **CSRL and the ONGC Super 30 team.**

I will remain forever grateful to CSRL, the faculty, and the entire management for believing in me, supporting me, and empowering me to pursue my dreams. Their faith in my potential has been the driving force behind my achievement.

I grew up in a family where financial hardship was a daily reality. From an early age, I understood that education was not just important—it was my only path forward. With that belief, I committed myself fully to my studies.

My first turning point came when I was selected for Jawahar Navodaya Vidyalaya, which gave me a strong academic foundation and the confidence to aim higher. Yet, preparing for the IIT-JEE still felt out of reach due to financial constraints.

That changed when I became part of Super 100, Noida. The programme transformed my aspirations into achievable goals by providing high-quality academic coaching, accommodation, and comprehensive support—entirely free of cost. Freed from financial worry, I was able to focus completely on learning, guided by dedicated teachers and mentors.

That focus and support bore fruit. Today, I am pursuing a B.Tech in Computer Science and Engineering at IIT Tirupati—carrying forward a journey that began with a simple belief in the power of education.

My journey at CSRL GAIL Utkarsh Super 80, Banaras, has been one of the most emotional and meaningful phases of my life. From the very beginning, our teachers and mentors not only taught us academics but also stood by us like family. They supported us through our lowest moments and created a warm, nurturing environment that made even the toughest days easier to face.

Our seniors were a constant source of motivation—always ready to guide, inform, and uplift us through their words and presence. Their support helped us believe that success is possible with the right mindset and a spirit of unity.

There were many nights filled with stress and even tears, but my friends made me stronger. From festivals to failures, everything became a lesson and a collection of lifelong memories.

This coaching programme did not just help me reach IIT Roorkee—it gave me values, lessons, friendships, and a new perspective on life. It inspired me to remain grounded, to help others selflessly, and to always lead with kindness. I will always carry this journey close to my heart and remain forever grateful to every single person who was part of it.

My father is a farmer, and my mother is a housewife. When I was a child, I had no guidance about what I should do in the future. I then appeared for the JNVST examination and got selected. I studied there for seven years, where I learned how to study effectively. I met very good teachers who supported me greatly, and with their guidance, I completed my Class 12 with good marks.

After that, I had to decide where to take coaching for NEET. Our financial condition was not strong enough for me to afford private coaching. At that time, my Physics teacher, Mr. Vinay Khandelwal, informed me about GAIL Utkarsh Super 80, and that is when my NEET preparation journey began at GUS 80, Varanasi.

When I reached there, I truly understood what real competition meant. I dedicated an entire year to my preparation and received immense support. The teachers were excellent, and being there helped me realize the seriousness of the competition. Students study for 14–15 hours a day, and watching other girls study motivated me even more.

Within a year, I appeared for the NEET examination. I scored 564 marks with an All India Rank (AIR) of 7121 in NEET 2025. Through this achievement, I secured admission to one of Madhya Pradesh's best government medical colleges.

Ever since childhood, I have been deeply inclined towards the world of Mathematics and Science. In Class 12, I dared to dream big, to crack one of the toughest examinations in India and earn a place in the prestigious IITs. It was not just a personal ambition; it was a hope to make my family proud and secure a better future.

My first attempt did not go as planned. Failure brought with it fear, pressure, and a flood of "what ifs." Yet, somewhere deep within, I knew I could do better, if only I gave myself another chance with greater focus and clarity.

Coming from a financially humble background, private coaching was not an option. That was when **GAIL Utkarsh Super 50, Haldwani,** entered my life like a ray of hope. I appeared for the entrance examination in Class 12, cleared the interview, and was selected. That moment became the true turning point of my journey.

Securing admission to **IIT (BHU), Varanasi,** was not merely the result of one year's effort; it was the outcome of patience, perseverance, and unwavering belief through one of the most challenging phases of my life. During that year, I rebuilt myself, not just as a student, but as a stronger, wiser individual.

Today, as a proud IITian, I look back with deep gratitude, for the second chance, for GAIL Utkarsh Super 50, and for the decision to never give up.

My journey to IIT Roorkee has been truly remarkable, and I owe it entirely to CSRL Super 30. It all began in Class 12 when my maths teacher introduced me to the CSRL entrance exam. I cleared the exam and was selected for the RailTel Akansha Super 30 program in Dehradun. The following 11 months were transformative. I met incredible peers who became like family, and the collaborative learning environment made every challenge enjoyable.

The study materials, including Testa JEE Mains and Advanced textbooks and online test series, were of the highest quality. Our faculty, along with the project manager and officers, provided constant guidance and motivation. Yet, what I cherished most was the homely atmosphere—everyone was kind, encouraging, and supportive. Beyond academics, we shared memorable moments together, from celebrating birthdays to cheering on India-Pakistan matches.

I am deeply grateful to the entire CSRL team for believing in me and nurturing my potential. Today, as I pursue my studies at IIT Roorkee, I carry with me the values, discipline, and support instilled by CSRL Super 30. Their guidance has truly made my dream a reality.

My preparation for JEE truly began with CSRL – HPCL Super 50, Mumbai. Through this program, I received valuable coaching for JEE Mains and Advanced, which played a transformative role in my academic journey.

Throughout this time, the faculty members provided constant guidance and support. They not only helped me strengthen my concepts but also motivated me whenever I faced challenges. The learning environment at CSRL was always positive and encouraging, which pushed me to give my best every single day.

A very special mention goes to our Project Manager – Vinita Ma'am, whose continuous guidance and support have been instrumental in my growth. Her encouragement and belief in me gave me the confidence to aim higher and stay determined in achieving my goals. Today, I feel proud to share that I am pursuing two degrees simultaneously.
Apart from academics, I also pursue my interests passionately. My hobbies include coding, painting, and playing chess, which not only help me stay creative and analytical but also keep me balanced and motivated in my journey.

These achievements are not just personal milestones, but also a reflection of the platform, mentorship, and opportunities that CSRL provided me.

I am deeply grateful to CSRL, HPCL Super 50 Mumbai, all my faculty members, and especially Vinita Ma'am for being a constant source of strength and support in this journey. Without them, reaching here would not have been possible.

Like many children, I dreamed of becoming a doctor. However, my first attempt did not yield the desired result, and it was a deeply disappointing phase. It was during this time that I learned about **HPCL Super 50, Mumbai,** which gave me renewed hope and a fresh beginning.

With new teachers, a supportive peer group, and a structured environment, I restarted my preparation with determination. I made a firm promise to myself that the enthusiasm I carried on the first day would remain unchanged throughout the year. Every day, I revised what was taught in class and ensured that my learning was consistent and disciplined.

One practice that proved especially valuable was my approach to tests. After every three-hour examination, I devoted an additional three to four hours to detailed paper analysis. This habit helped me identify my strengths and shortcomings, allowing me to improve continuously. Over time, this process built clarity, confidence, and exam readiness.

The entire year followed this disciplined routine, and on the final examination day, my habit of self-analysis proved invaluable. When the results were declared, I was allotted **AIIMS Bilaspur.** In that moment, a long-cherished dream finally became a reality.

This journey has taught me the importance of perseverance, self-belief, and disciplined effort. I remain deeply grateful to CSRL Super 50, Mumbai, for providing the guidance, support, and environment that helped me turn a setback into success.

I belong to an OBC family, with agriculture as our primary source of livelihood. My father is a farmer, and my mother is a homemaker. I completed my schooling at Jawahar Navodaya Vidyalaya, Jalgaon, where I studied under the CBSE board. Growing up in a rural setting, life was not always easy and opportunities were limited, but my parents consistently encouraged me to pursue education as a means to build a better future.

Preparing for competitive examinations posed significant challenges. Financial constraints, limited exposure, and balancing academic responsibilities with everyday realities made the journey demanding. However, I remained focused on my goals and committed myself to consistent hard work.

My turning point came with the support and guidance provided by CSRL. The structured academic preparation, mentoring, and continuous motivation helped me identify my strengths and work systematically on my weaknesses. CSRL's disciplined approach and thoughtful planning gave me clarity, confidence, and direction in my preparation.

With dedication and the right guidance, I was able to strengthen my academic performance and move forward with greater self-belief. This journey has not only improved my academic preparedness but has also shaped my mindset, helping me approach challenges with confidence and determination.

I am deeply grateful to CSRL and ONGC for extending this opportunity to students like me from modest backgrounds. Their support has played a transformative role in my life, inspiring me to dream bigger and work harder towards achieving my aspirations.

I am currently studying Electronics and Telecommunication Engineering at IIEST, Shibpur, something I once believed was far beyond my reach.

For me, CSRL was never just a coaching centre; it was home. A home for students like me who needed guidance, care, and a second chance.

I come from a humble family. My father is a hawker, and my mother is a homemaker. Both of them studied only up to Class 4. As the first girl in my family to pursue higher education to this extent, I often felt uncertain and lost. After completing my Class 12, I went through a very difficult phase, unsure of how to continue my education or what steps to take next. That was when CSRL became the light that showed me a way forward.

The teachers at CSRL were always by our side, guiding us, motivating us, and believing in us even when we struggled to believe in ourselves. The mess staff, too, felt like family. They cared for us when we were unwell and ensured that we never felt alone.

The mock tests at CSRL were demanding, but they made us stronger. They taught us discipline, patience, and the importance of perseverance, no matter how challenging the journey became.

Today, when I look back, I feel deep gratitude. From Minakshi Ma'am to the security staff, everyone at CSRL played a role in shaping my journey. They gave me not just an education, but confidence, courage, and hope.

I come from Chakda, West Bengal, and have always been a shy and introverted person. Technology and coding were my comfort zone, even when academics did not come easily to me. While I was not considered a top-performing student initially, my growing interest in technology inspired me to dream of studying Computer Science at an IIT.

My preparation journey was challenging from the very beginning. I had very limited resources and only about two months to prepare seriously for the JEE examination. The lack of proper guidance added to my difficulties. A sudden revision of my JEE Main score, from 216 to 176, affected my confidence deeply, and the pressure began to take a toll on my performance, especially as JEE Advanced approached.

Everything changed when I joined CSRL's Sukna Centre under the Prabal Army Super 50 project. The faculty members believed in me even when I doubted myself. They guided me to focus calmly and strategically on JEE Advanced, helping me manage pressure and stay mentally strong. Their constant motivation gave me the confidence to move forward.

Today, I am proud to be a student of IIT Dharwad, pursuing Computer Science and Engineering. This journey would not have been possible without the unwavering support of CSRL, my teachers, and my mentors. CSRL did not just provide me with quality education and resources; it empowered me to believe in myself and pursue my dream with confidence.

I come from a humble village in Dhubri district of Assam. My father runs a small tea stall and works tirelessly to support our family, ensuring that my dream of receiving a quality education never fades. Watching my family struggle motivated me to work harder, and I learned to treat every challenge as an opportunity to grow.

In 2024, I was selected for Oil Pragyan Super 30, Nagaon, an educational initiative by the Centre for Social Responsibility & Leadership (CSRL), sponsored by Oil India Limited. During the 11 months I spent there, intensive mentorship, discipline, and consistent hard work helped me transform both academically and personally. I developed the determination and confidence needed to aim higher.

My journey was not without setbacks. In JEE Main, I scored 81.18 percentile with a category rank of 97,484, a result that was not sufficient to secure admission to a reputed institution. However, I refused to give up. With renewed determination, I pushed my limits while preparing for JEE Advanced and secured 89 marks with a category rank of 6,201. This achievement earned me admission to the prestigious **IIT (ISM) Dhanbad.**

My journey has taught me that success is not defined by background, resources, or category. With dedication, self-belief, and the right guidance, even the toughest goals can be achieved. Today, I stand proud of how far I have come and hope my story inspires aspirants across Assam to believe that dreams do come true when one treats education as a challenge worth conquering.

I come from Hazuwa, a small village in Baksa district, Assam, where most families depend on farming and manual labour for their livelihood. My father is a farmer, and my mother is a homemaker. Despite our limited means, my parents always did their best to provide me with a quality education.

After completing Class 12, I nurtured a strong desire to crack the IIT-JEE. However, my parents could not afford the high fees required for coaching. The challenges were many, but my dreams were even bigger. At that crucial moment, Super 30 entered my life as a ray of hope. I appeared for the Super 30 entrance examination and was fortunate to be selected.

The environment at Super 30 not only helped me prepare academically for the examination but also taught me discipline, teamwork, and how to face challenges in life with confidence. Super 30 gave me the opportunity to turn my dream of becoming an IITian into reality.

Today, I am studying at **IIT (BHU),** Varanasi. I am deeply grateful to CSRL and Oil India Limited for believing in me and giving me this life-changing opportunity.

There was a time when I was unsure if I would ever be able to crack NEET. Coming from a financially weak background, having lost my father at the age of ten, and with my mother currently battling third-stage cancer, the odds were clearly stacked against me. I had the dream, but not the means, and the path ahead felt uncertain.

Everything changed when I was selected for Oil Pragyan Super 30. That single opportunity became the turning point of my life. It gave me hope, direction, and the belief that my dream of becoming a doctor could truly become a reality. Those eleven months at the institute were about much more than academics. They marked a journey of deep personal transformation. The teachers did not merely teach; they believed in me, even during moments when I doubted myself. Their constant guidance, patience, and unwavering faith helped me navigate some of the most challenging days of my life. The emotional and mental support I received there is beyond words.

They provided every facility I could have asked for, including books, accommodation, nutritious food, a disciplined routine, and most importantly, a warm, family-like environment. I always felt cared for, supported, and valued. The friendships I built and the memories I created will remain close to my heart forever.

Without this opportunity, I would not be where I am today. I move forward carrying not only the success of cracking NEET, but also the values, discipline, resilience, and kindness that this journey has instilled in me.

I was born in Pirika Gaon, a small village in Dhemaji district, surrounded by rivers and with limited access to basic facilities. My father is a farmer, my mother manages our home, and we are a family of five living in a bamboo-and-mud house. Life has always involved struggle and sacrifice.

With no school in my village, I began my education late at Christ King High School, far from home. Every day, my father took me to school on his bicycle, often carrying me across the river on his back when there was no bridge, especially during the rainy season. These hardships taught me resilience and determination.

My interest in Biology grew stronger, and I cleared the HS exam even without proper guidance. After learning about CSRL Super 30 through YouTube, I cleared the CBT and interview round and was selected for ONGC Super 30, Golaghat (2024–25).

CSRL Super 30 became my guiding light. Though my foundation was weak, the discipline, mentoring, and encouragement kept me moving forward. The programme taught me honesty, consistency, and unity. I will always remember the words, "Agar aapki padhai mein imaandari hai, toh aapka selection zaroor hoga."

I come from a family of five in Arunachal Pradesh, with an annual income of ₹60,000. From an early age, I aspired to rise above limitations and create a better future for my family, community, and country. Pursuing IIT became my way of turning that aspiration into action.

My journey was challenging—struggles with basic concepts, concentration, and time management tested my resolve. Everything changed when I joined ONGC Super 30, Agartala. There, I received not only academic mentoring but also emotional and residential support in a safe and nurturing environment. Dedicated teachers, structured routines, and continuous guidance helped me grow in confidence and capability.

Today, I am a proud student of IIT Guwahati. I remain deeply grateful to CSRL and ONGC Super 30 for believing in me, and I aspire to give back by supporting others just as I was supported.

I am deeply grateful to Oil Pragyan Super 30, Itanagar, a CSR initiative of CSRL and Oil India Limited, for giving me the opportunity to be part of this programme. The eleven-month journey there was truly life-changing. It taught me invaluable lessons, ranging from financial support to consistent academic guidance, all of which helped me reach my dream institute, IIT.

Securing admission to an IIT had always been my greatest aspiration, and Oil Pragyan Super 30 became the bridge that turned this dream into reality. The nurturing environment strengthened my belief in myself and encouraged me to dream beyond limitations. The teachers, staff members, and my peers supported me wholeheartedly, both mentally and physically, motivating me through every challenge.

The memories I created at Super 30 will stay with me forever. They continue to inspire me to pursue my future goals with the same determination and passion. I once again express my heartfelt gratitude to the Oil Pragyan Super 30 family, CSRL, and Oil India Limited for shaping not only my career, but also my confidence and courage.

My father works as a supervisor in a private-sector job. Despite limited financial resources, my parents always believed in the power of education and encouraged me to dream beyond our circumstances.

A defining turning point in my journey came when I learned about **CSRL Super 30.** After clearing the written examination and interview process, I was selected for this prestigious programme. Over the next year, I prepared with complete dedication and discipline for the JEE examination under the structured guidance provided by CSRL.

With consistent effort, focused preparation, and strong mentorship, I achieved a 99.56 percentile in JEE Main, secured AIR 6852 in JEE Main, and AIR 6372 in JEE Advanced. Today, I am proud to be pursuing my studies at the Indian Institute of Information Technology, Allahabad **(IIIT Allahabad),** a premier government institution renowned for its strong academic and coding culture. This journey from a humble beginning to a reputed institute has been made possible by the unwavering support, discipline, and opportunities provided by CSRL Super 30, for which I will always remain sincerely grateful.

The people behind our progress

I come from Begusarai, Bihar, where my journey began—quietly, with steady steps and big aspirations. My education took shape there, followed by professional training in Accounting and an MBA in Finance, equipping me for the road ahead.

I joined CSRL in 2007 as a fresher, at a time when the organisation worked out of a single room in Delhi—small in size, rich in intent. With no prior experience, I learned by observing, listening, and being trusted with responsibility.

As CSRL grew, so did I. Roles expanded, challenges multiplied, and each new responsibility strengthened my understanding of finance, compliance, and stewardship.

Today, CSRL stands as a large, impact-driven organisation. I serve as **Deputy General Manager – Finance & Accounts,** working with a committed team to ensure financial integrity, compliance, and sustainable growth.

From a terrace office to a national presence, this journey has been shaped by trust, learning, and shared purpose. It is a journey I continue with gratitude.

Ritesh Kumar
DGM Accounts

मैंने वर्ष 2015 में CSRL जॉइन किया, जब संस्था एक 3-BHK फ्लैट से संचालित होती थी और केवल 9 प्रोजेक्ट्स थे। शुरुआत में काम करने का तरीका नया और चुनौतीपूर्ण लगा, लेकिन जल्द ही समझ आया कि यही CSRL की सबसे बड़ी ताकत है। आज, 10 वर्ष पूरे होने पर, उन शुरुआती आशंकाओं को याद कर मुस्कुराहट आ जाती है।

CSRL में काम करते हुए सीखने के असीम अवसर मिले। जिम्मेदारियों के साथ नेतृत्व का भरोसा था—"करो, हम साथ हैं।" अलग-अलग असाइनमेंट्स ने न केवल आत्मविश्वास बढ़ाया, बल्कि मेरी जॉब प्रोफाइल को भी आकार दिया। संस्था छोटी थी, पर संभावनाएँ असीम थीं।

समय के साथ CSRL भी बढ़ा और हम भी। आज एक बड़े कार्यालय में कार्य करते हुए 27 सुपर-30 प्रोजेक्ट्स की यात्रा का हिस्सा बनना गर्व का विषय है। इस दौरान असिस्टेंट मैनेजर से डिप्टी जनरल मैनेजर (क्लाइंट सर्विस) तक का सफर सीख, विश्वास और जिम्मेदारियों से भरा रहा।

CSRL ने मुझे केवल पेशेवर नहीं, बल्कि व्यक्तिगत सहयोग भी दिया। यहाँ ऑफिस और परिवार के बीच कभी दूरी महसूस नहीं हुई। उत्सव, साथ बिताए छोटे-छोटे पल और अपनापन इस कार्यस्थल को विशेष बनाते हैं।

मैं स्वयं को सौभाग्यशाली मानता हूँ कि मुझे ऐसा नेतृत्व मिला, जिनसे सीखा गया हर मूल्य आज मेरी सबसे बड़ी पूँजी है। हम यहाँ केवल कर्मचारी नहीं, बल्कि "Transforming Lives" के मिशन के सहयात्री हैं।

इस निरंतर साथ और विश्वास के लिए मैं CSRL मैनेजमेंट का हृदय से आभार व्यक्त करता हूँ।

Chandramohan Mishra
DGM Client Services

The academic year 2024–25 brought its share of challenges, yet the mission of CSRL—to transform lives—remained my guiding purpose. While the journey of nurturing students to reach the heights of the country's best colleges was demanding, every effort was embraced with dedication and optimism.

A highlight of the year was the faculty meeting, where interactions with authorities and colleagues from across centres proved deeply enriching. Grateful for the trust and respect I have received, I remain committed to guiding students, sharing knowledge, and contributing to their growth, ever mindful that life itself is a continuous journey toward betterment.

Sunil Balani
Faculty
OIL Pragyan Super 30, Jodhpur

Over the past eight years of working with CSRL, I have had the privilege of teaching and mentoring students preparing for JEE and NEET. Teaching has always been more than just a profession for me, it is my passion. I enjoy teaching students from the basics of a concept to its advanced applications, helping them build the confidence to tackle even the toughest of problems.

In this journey, I have been fortunate to witness remarkable achievements by my students. One of them secured Rank 1 in NEET Assam, another achieved Rank 1 in Assam CEE, and many others have made it to the top IITs, NITs, and prestigious medical colleges across the country. These milestones are not just their victories but also reflections of the dedication, discipline, and determination that education can instill.

What I have learned through these experiences is that true teaching goes beyond imparting knowledge. It is about nurturing curiosity, building problem-solving skills, and guiding students to remain resilient in the face of challenges. When students are encouraged to think independently and develop a strong foundation, success naturally follows.

For me, the greatest reward lies not only in the ranks and results but in seeing my students grow into confident, responsible individuals who are prepared to make a difference in society. That is the true power of education.

Irshad Raushan
Faculty
OIL Pragyan Super 30, Guwahati & Nagaon

Over this academic session, my journey as a Biology faculty member at CSRL has been enriching and transformational. Working with highly motivated students from diverse backgrounds has reinforced my belief that the right academic guidance, emotional support, and disciplined mentorship can inspire learners to transcend their limitations and strive for excellence.

Through interactive classroom discussions, regular assessments, personalized mentoring, and doubt-resolution sessions, I witnessed a remarkable improvement in students' confidence, consistency, and problem-solving abilities. Many students demonstrated significant academic and personal growth, which has been one of the most rewarding aspects of this journey.

The collaborative environment at CSRL, combined with the dedication of students and team members, has played a vital role in creating meaningful academic impact.

Overall, this session has reaffirmed my belief that true transformation is not only about academic achievement but also about nurturing resilience, self-belief, and character in students. I am grateful to have contributed to this mission and to be a part of their transformative learning journey.

HPCL Super 50, Mumbai

Joining CSRL Super 30 as a Mathematics teacher has been one of the most rewarding decisions I've ever made. Teaching underprivileged students who are preparing for the tough JEE exam feels like more than just a job – it's a chance to make a real difference in their lives.When I first started, I was excited but also a little unsure how I'd connect with these bright kids coming from challenging backgrounds. But honestly, their hunger to learn and sheer determination blew me away from day one. These students are so dedicated – they ask the smartest questions, stay back for extra doubts, and push themselves harder than anyone I've taught before. Teaching them calculus, algebra, or coordinate geometry isn't just about solving problems; it's about seeing that spark in their eyes when a tough concept finally clicks.What I truly love is the supportive environment here at CSRL. The faculty team is like a family – we plan lessons together, share ideas, and motivate each other. The management takes care of everything so we can focus purely on teaching: good resources, comfortable setup, and no financial burdens on the students. Watching these kids grow in confidence, improve their scores in mocks, and start believing in their IIT dreams is incredibly fulfilling. Some of them have already shown such amazing progress in Maths, and it makes me proud to be part of that.CSRL Super 30 is doing something special – giving talented students from humble backgrounds a fair shot at success, completely free of cost. I'm grateful to be contributing as a teacher and helping shape their futures. It's inspiring work, and I'm loving every moment of it!
